```java
 1  package com.company;
 2
 3  public class Main {
 4
 5      public static void main(String[] args) {
 6          int ilw = 20;
 7          int [] wek = new int[ilw];
 8          int i;
 9  //generuje wektor N-elementowy,z liczb od 0 do 99
10          for (i=0;i<ilw;i++)
11              wek[i]=(int)(100*Math.random());
12
13
14
15      }
16  }
17
```
